

W Series

Color Screen Fingerprint & Card
Time Attendance and Access Control

Quick Guide V1.1

W 1

W 2

W1 & W2 Features

- * Standard 2.8-inch TFT LCD, 512MB Flash, industrial high speed CPU
- * Touch keypad & touch active sensor
- * Identification mode: Fingerprint, Password, Card (optional)
- * Cloud management system support
- * Support webserver: basic setting, personnel inquiry and management, records inquiry
- * DDNS: Support dynamic domain name server which offers a persistent domain name for non-static IP devices
- * Support TCP/IP network communication, the access control data and events will push to the access control management software by real time.
- * With 32 customize access control time zone and 16 permission groups make access control more easy (W2 access control)
- * Communication: TCP/IP, Mini USB, USB Host, RS485 (RS485 is for W2 access control)
- * W2 In/Out: 1 relay output, wiegand input/output, door switch, door sensor, tamper alarm
- * Registration capacity: 3000 Fingerprints and 100000 Records

Installation Guide

1. What's in the package?

1 Device

W1 or W2

*Card is optional

2 Instruction Package

3 Accessory Package

*Power adapter is only for W1

USB

*Two extended function connector cables are only for W2

2. Mount the Device to Wall

- * Install the mounting panel on the wall
- * Plug in the Ethernet cable, charger or extended function connector cable
- * Slide the W1 or W2 down onto the panel and secure with the screw on the bottom of device

Important notice: Please follow the wiring diagram as it is displayed. Damaged products diagram as it is displayed. Damaged products due to improper wiring are not covered under the product warranty.

W2 & Switching Power Supply

Switch Power Supply

Wiegand Card Reader

W2 & Anviz SC011

SC011 can work with W2 by Anviz encrypt Wiegand code authorized to set up a distributed access control system. Wiegand mode must be set to 'AnvizWiegand' by PC software. You can buy SC011 from our sales.

Switch Power Supply

Exit Button

Anviz Wiegand date output format:

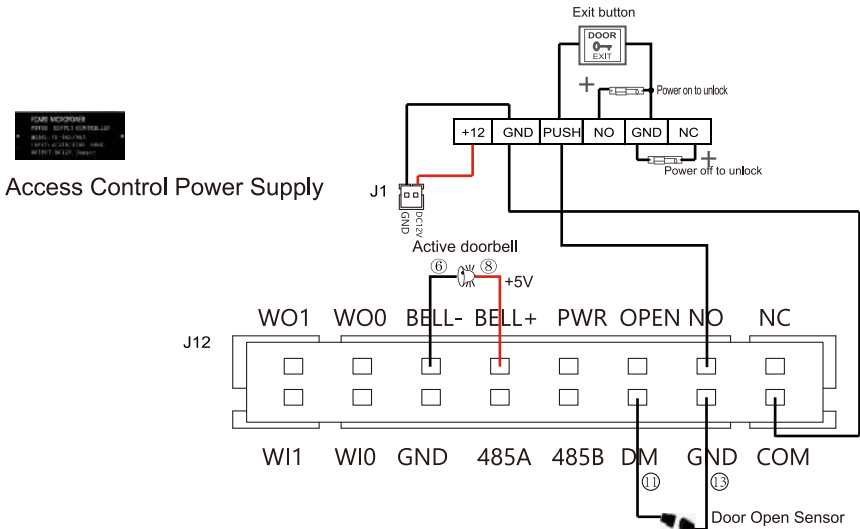

ALL registered users output devices' last eight serial number.
(For example, SN of one device is 1050000014470004, then Anviz Wiegand output 14470004.)

Wiegand 26 date output format (W2 & other access control):

Card user: Output card number.(Decimal)

Fingerprint user: Output ID number.

W2 & Access Control Power Supply

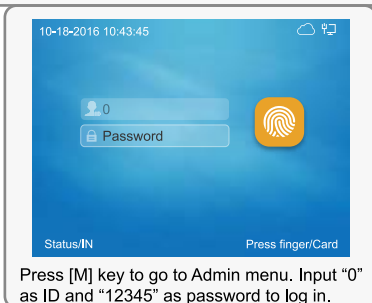

Have a question? Please feel free to send emails to support@anziv.com to get support.

Basic Operation

1. Turn on the Device

Plug in the power supply and wait for the device boot up.

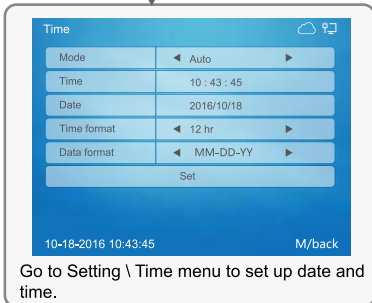

Press [M] key to go to Admin menu. Input "0" as ID and "12345" as password to log in.

* 0/12345 is the default Admin ID and password. You can change to your own the password or set other user as Admin later.

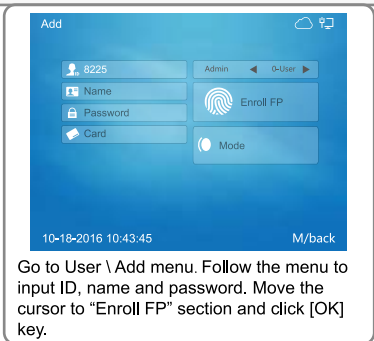

Browse the Setting \ Device menu to view or edit the Device ID and Admin PIN Code.

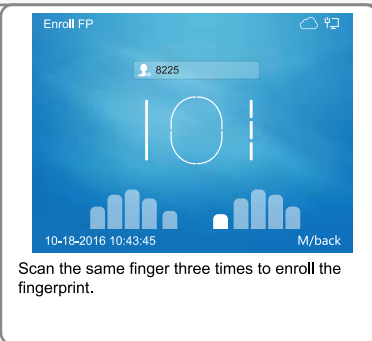

Go to Setting \ Time menu to set up date and time.

2. Add Users to Device

Go to User \ Add menu. Follow the menu to input ID, name and password. Move the cursor to "Enroll FP" section and click [OK] key.

Scan the same finger three times to enroll the fingerprint.

* RFID Card is the optional feature. If you have the card option and want to enroll the card, use the up & down key to move the cursor to card number field. Swipe the card in the field of card module. The card number will be displayed.

3. Input Characters

When you edit name, you may need to input characters. Here are the steps to input characters:

- * Using the up and down arrow key to move the cursor to the field.
- * Press [Fn] key on the keypad, a character input window "Aa" will be displayed on the bottom of the screen. Then press the number/letter key. A second window will appear and you can select the letter by number key .
- * Press [IN] key on the keypad, the character input window will toggled between "Aa", "123", ",.!?" and "拼". You can select the window to input the letter, number or special symbols.

4. Verity the Fingerprint

■ Correct method :

Place finger in the center of the sensor.

Place finger flatly and smoothly on the sensor.

■ Incorrect method :

Finger not placed on the center of the sensor

Finger placed inclined

Use of fingertip

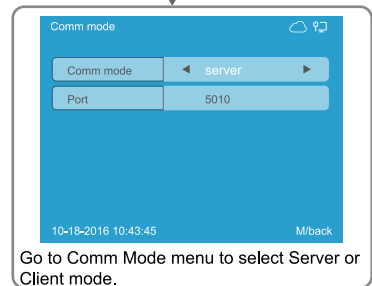

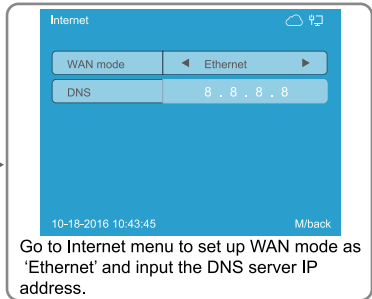

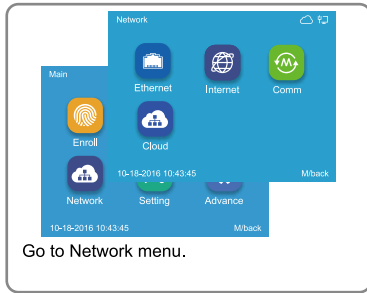

Note:

1. It is better for each user to register two finger prints in case of one finger can't work.
2. Place finger flat and make sure the center of the finger is on the center of scanner window and press a little hard on scanner, so it can scan as large finger area as possible to extract enough minutia.
3. Keep the angle and direction of finger the same each time placing on scanner.
4. If your finger has sweat or water, please dry it first and then register the finger.
5. If your finger is too dry, make it a little wet or touch the forehead to increase the wetness of the finger, press a little hard on scanner. (The dry finger can cause the finger image not coming out clear enough.)
6. Avoid the callus, peeling, or injury of the finger to ensure the register and identification successful.
7. You can register the thumb first, and then index finger or middle finger to increase the precision.

5. Setup the Device Communication

- * Go to Network \ Internet menu to select Ethernet or close Ethernet
- * Go to Network \ Communication Mode to select Server or Client mode , RS485
- * Go to Network menu to setup Ethernet parameter according to your network settings
- * Ping the IP address of Device from the management computer. Make sure the Ping is successful

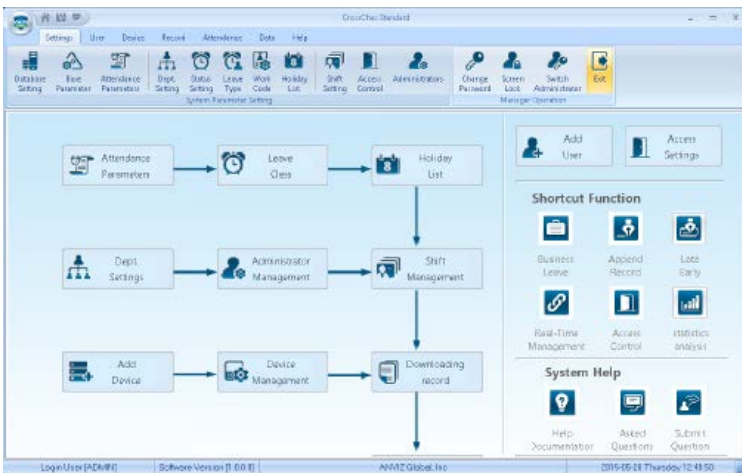

Ethernet Settings

Working with Management Software

1. Install the Management Software on Computer

Put the CD in the management computer. The installation program will run automatically.

How to connect the Device with Software?

1st Method: Mini USB

- 1 Loose the screw on the bottom of device, then pull up the front case, separate from back panel
- 2 Connect USB cable between with device and PC which has installed software

2nd Method: Connect to Network

Right click on the device icon and choose 'Set the IP configuration' to set correct network environment parameters such as above window.

2. Enable Communication between Device and the Management Software CrossChex

- * Turn on management software CrossChex
- * Go to Device tab. Search and Add the W1 or W2 to management software CrossChex
- * Click Synchronize Time button to communicate with Device. If Synchronize is successful, the device icon will turn to blue

3. The Management Software CrossChex Features

- * Device \ Backup User: Download user info from Device to CrossChex
- * Device \ Download Records: Download records from Device to CrossChex
- * User \ Modify: Edit name or other user info. Then click "Upload User" \ Upload user info to device
- * Record \ Search: Search and view the records
- * Attendance: Calculate, Search results and Generate reports
- * Data \ Backup Database: Backup Database
- * Setting \ Shift: Set up Time Table and Scheduling
- * Device \ Device Parameter: Set up device, Clear records on Device or Reset Device to factory settings
